**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-48, drawn to a handpiece with an electrode assembly, classified in class 606, subclass 34.
- II. Claims 49-72 and 85, drawn to a removable electrode assembly, classified in class 606, subclass 41.
- III. Claims 73-84, and 86-111, drawn to an electrode insert, classified in class 606, subclass 27.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are integral to a handpiece, removable from a medical device, and capable of insertion into a different device such as a catheter, respectively.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and/or III, restriction for examination purposes as indicated is proper.

A telephone call was made to Paul Davis on 9-29-04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
